Why good hearing is so important

Our hearing plays an important role in how we interact with the world around us. It facilitates the forming of relationships and opens up a wealth of sensory experiences. It is also very complex and extremely sensitive, so we need to give it the attention it deserves.

It's only when our hearing starts to deteriorate significantly, that we realise just how important it is in our everyday lives, and how much we miss it when we no longer hear as well as we used to.

Fully enjoy hearing

From your smartphone to your sports shoes, finding the right accessories helps you to get the most out of life. The same is now possible for your hearing. Hearing what matters has never been more important in today's busy world, where a missed word can mean a missed opportunity.

The hearing solutions from Signia Stretta are designed to give you that edge. Now you no longer have to worry about missing out on conversations. The earlier we are properly fitted with hearing aids, the better, even if you only have slight hearing loss - as when you hear well again the brain is stimulated and mental vitality is maintained.

A great sound experience from the first fit

When you want to get the most out of life, hearing others clearly is essential – especially when in noisy environments.

Signia Stretta hearing aids feature Own Voice Processing™ (OVP) that recognises and processes your own voice separately, resulting in a more balanced perception of your voice and how you hear others. Advanced Soundscape Processing then works to mimic the way we naturally localise sound, enhancing the soundscape around you for better spatial awareness and overall speech understanding.

**Be
Brilliant™**

Speech in noise

Thanks to their superior speech quality, Signia Stretta hearing aids enable you to hear speech clearly in all situations through advanced noise suppression technologies. This makes it easier for you to understand your conversation partner, even in noisy environments such as a restaurant or a family gathering.

Crystal clear sound

Familiar and life-like sound in all environments is Signia Stretta's inspiration. This is the foundation for sound clarity, allowing crystal clear sound even in the loudest situations.

Hearing your own voice

Own Voice Processing (OVP) provides you with a natural sounding own voice, combined with optimal hearing of all other sounds for the most pleasant, natural listening experience.

Stream phone calls, music, and TV

Stream your favorite music straight into your ears, discreetly adjust the volume to suit your wishes while watching a new show on TV, or hear your friends voice while on a phone call with them. All you need is a smartphone.

Via the Signia app, our hearing aids offer you supreme connectivity for audio streaming and remote control – all at your fingertips.

Signia app

You're in control! The Signia app gives you everything you need to enjoy your hearing aids to the full.

Easy to use, it lets you discreetly control the volume and other settings while streaming audio directly into your ears. With the Signia app, you can also stay in touch with your Audiologist via TeleCare, accessing remote support when you cannot visit them in person.

Signia Stretta family, which one is right for you?

The Signia Stretta family are all fully featured, ready to help you immerse yourself in the world and connect to family and friends around you.

Your hearing instrument will be selected based on your hearing and lifestyle needs and your Audiologist will discuss any options with you at your hearing aid fitting appointment.

When hearing loss appears, it restricts your natural hearing experience. Now you can improve your hearing to a remarkable new level and even preserve the familiar sound of your own voice – thanks to Signia Stretta hearing aids with Own Voice Processing™ (OVP).

Signia Stretta's elegant solutions replicate the normal experience of hearing everything in harmony. They also offer direct streaming of phone calls, music, and TV audio via Bluetooth®, while the Signia app provides everything you need to enjoy your hearing aids to the full - according to your personal preferences: audio streaming, remote control and remote support. All you need is your smartphone.
